

FUBARA SOKURU

GOD'SWEALTH

Full Stack Developer

I am a passionate and driven developer, constantly seeking to create innovative and efficient digital solutions. I thrive on challenges, embrace continuous learning, and am committed to delivering high-quality work that makes a meaningful impact.

As a dedicated developer, I combine creativity and technical expertise to build scalable and user-focused applications. I am motivated by solving complex problems, learning new technologies, and contributing to projects that drive real results.

Experience (02)

2020-2022

Jr. Front End Developer

Uc. Computer Sys.

Fulltime

I worked as a Front End Developer focused on building interactive and responsive user interfaces. During this period, I collaborated on web-based solutions that required clean layouts, smooth user interactions, and performance optimization.

2022-2023

Back End Developer

Igwe Chukwu Fou.

Remote

I worked as a Back End Developer responsible for building and maintaining secure, scalable server-side systems. My role involved developing APIs, managing databases, and ensuring smooth data flow between the front end and backend services.

2023-2024

Full Stack Developer

WM IT Solutions.

Fulltime

I worked as a Full Stack Developer, handling both front-end and back-end development to deliver complete digital solutions. My responsibilities included building responsive user interfaces, developing secure server-side logic, and managing databases.

Education & Skills (03)

Bachelor of Technology (B.Tech) – Electrical/Electronic Engineering
University of Port Harcourt 2022 – Till Present

I am currently doing my B.Tech in Electrical/Electronic Engineering, gaining a strong foundation in circuit design, control systems, and digital electronics. During my studies, I developed analytical and problem-solving skills, worked on practical engineering projects, and gained hands-on experience with modern electrical systems and technologies. This education prepared me for a career in software development and technology solutions by building a solid technical and logical foundation.

Mastered the follow tools and technologies below

Over the years, I have honed these skills through real-world projects, intensive training, and continuous practice in software development, design, and technology solutions.

Flutter

PHP

Python

React Js

Java Script

Laravel
